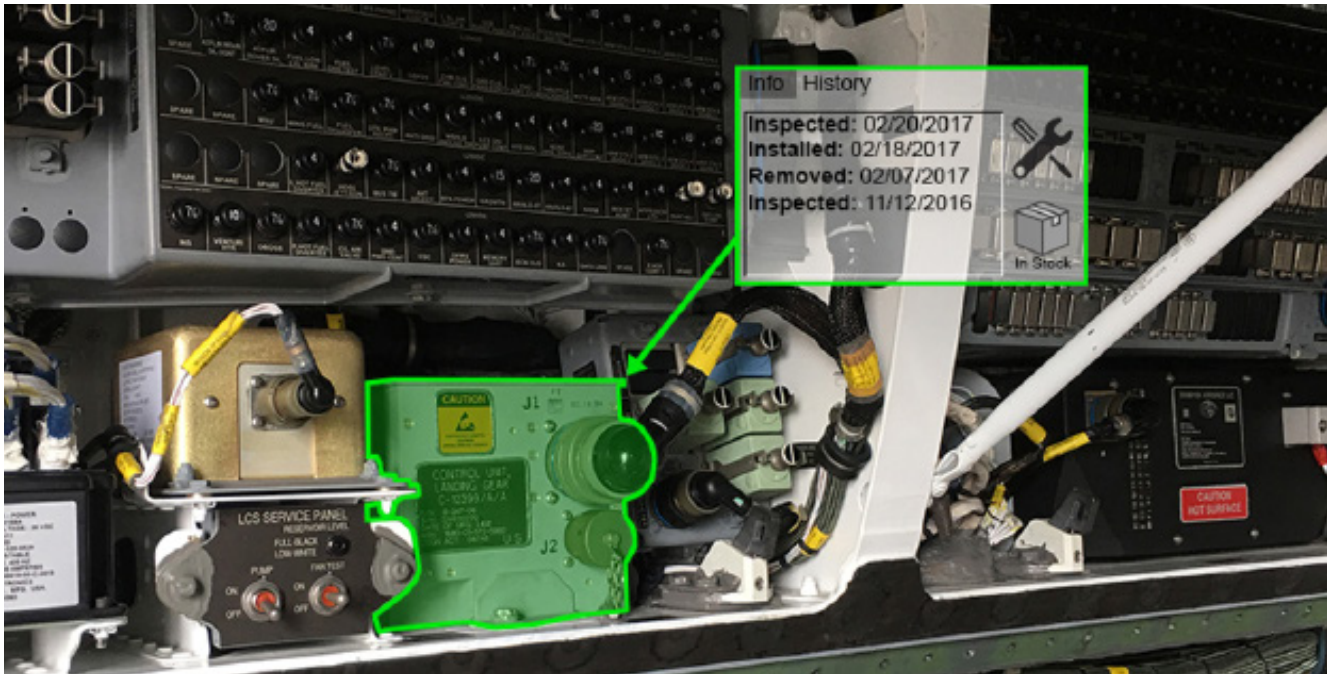
A codeless AR/MR software for creating heavy-duty, enterprise applications

INDUSTRIAL EXTENDED REALITY (XR) – SIMPLIFIED

Develop with Confidence

Leverage your existing tools with SimplifyXR's platform-agnostic, open architecture. Publish to MS Hololens, iOS, Android, or Universal Windows Platform. Use any Unity-supported CAD/animation tools. Use the vision science and tracking technique that supports your project: object/CAD, planar & marker tracking, or SLAM.



Five years ago, AVATAR Partners was asked by its customers to develop disruptive solutions that would result in zero errors, reduced time on task, safety of life, and increased profits. To ensure cost-effective AR/MR with 4,800% accuracy over industry standard, AVATAR developed SimplifyXR.

AVATAR Partners, the leader in heavy-duty industrial enterprise XR, uses SimplifyXR in-house for custom AR & MR applications for aerospace, automotive, construction, defense, manufacturing, medical and oil & gas. It is now available to the public.

- **4,800% Improved Accuracy**
- **100% Customizable**
- **10X Faster to Develop**
- **Drag and Drop Interface**

Heavy-Duty, Enterprise AR/MR across the Product Life Cycle

Enterprise Scalability

Save time, money and maintain flawless configuration management. Build foundational solutions, such as Quality Assurance Inspection, for reuse among multiple projects. No rebuild required!

Codeless, Feature Rich

A powerful workflow-based engine with hundreds of pre-built components that requires no coding. Everything that companies need to develop heavy-duty, industrial AR/MR applications is built in.

Simplified Creation

Let your best subject matter experts capture AR/MR content on the job, ensuring standardization of best practices.

User Performance Metrics

Productivity dashboards ensure optimal use of your AR/MR solutions.

100% Customizable

Integrate your own custom components into SimplifyXR through our fully extensible architecture.

Rapid Configuration

Quickly configure and reconfigure as your processes evolve through nonlinear, step-by-step solutions.
