Artificial Intelligence Technical Project Manager

About Us

Avatar Partners (www.avatarpartners.com) is a leading North American Extended Reality software provider for Government and Industry with headquarters in Irvine, CA. We specialize in best-in-class immersive reality solutions that Simplify Complex Systems™ to increase the efficiency, safety and effectiveness of equipment, systems, and processes.

Job Description

We are looking for a seasoned Project Manager experienced in leading a team through the full development lifecycle of software and AI technologies using the Unity Engine. You will work with several different teams to manage activities across different client projects, to continuously improve and adapt our development processes to enhance delivery. Working closely with our sales teams, you will facilitate communication with the client and ensure that visions are aligned across different fields, from design to engineering. This role may involve periodic travel. If you're client-focused and excited by the prospect of orchestrating complex product pipelines with teams spanning the continent, this is the job for you.

This is a remote, full-time salaried position.

Requirements

- You are a Technical Project Manager with extensive experience working on various software projects
- Broadly understand the technical capabilities of the Unity Engine, and Unity AI technologies
- You are a strong influencer with great communication skills, able to work with diverse group and align teams around common goals
- You are client focused, bring a professional attitude with stellar interpersonal skills, and are able to resolve conflicts with empathy
- You can adapt quickly to drive progress and you are comfortable with a fast-paced environment with changing project deliverables
- You can drive a culture of commitment with your teams

Desirable Qualifications

- Certification as Scrum Master or Scrum Product Owner
- Comfort with running Kanban, paired programming, or other agile projects
- Working knowledge of JIRA, Confluence, Gantt charts, and other Project Management Software
- Experience using Unity in a professional environment
- Some knowledge of coding or authoring 3D artwork

Responsibilities

- Play a core leadership role in managing the entire development, release and support processes of your projects
- Ensure alignment with cross-discipline members to unify goals, and ensure timely communication of relevant issues to stakeholders and tech leads
- Manage and predict the scope and capacity of the team throughout the project life cycle
- Continually drive day-to-day production across different internal development and external partner teams, scheduling sprints, balancing priorities, and tracking progress
- Analyze, track, and drive solutions for an risks in project development pipelines
- Build strong relationships with client teams, internal teams and external partners

Benefits

- Competitive Salary
- Competitive Benefits: Health, Vision, Dental & Chiro
- PTO Time
- Sick Time
- Health Insurance
- 401K
- Growth opportunity!
